

**Friday 15<sup>th</sup> May**

Good morning everyone

**Here are today's jokes:**

Q What do you give a sick lemon? A Lemonade

Q What do you do when you see a space man? A Park in it man!

Q What do you call a woman who lives on a hill? A Eileen  
Today's jokes are from Charlotte.

**Reading** – Don't forget to keep reading and enjoying different texts together.

**Friday's spellings:**

In your homework book make 2 sets of stars (or circles) like this:

One set is for you and one for your partner.

Play 'Four-in-a-row' with somebody at home. We play this in school, so you are familiar with this game. Choose a word from unit 7 in your logbook or words we have used this week (root words or the roots words + suffixes) and say it to your partner. Ask them to write it down. Circle any wrong letters. If the word is right, tick a shape on your partner's row of stars. Take turns. Can you spell four in a row correctly?

If you would like to practise your handwriting even more, try writing this week's spellings in joined-up writing or complete the extension task sheet from yesterday (either in your homework book or on the downloaded sheet).

**English: READ AND EDIT THIS BETTER AS WRITING UP A SCIENCE EXPERIMENT?**

Today, look again at the help sheet I attached yesterday on instructions. Read through the planning which you completed yesterday.

Your task today is to finish off write your set of instructions for setting up the science experiment from Monday on the topic task. These instructions will need to tell somebody how to set up the science experiment for changing the colour of petals by standing the flower in food colouring.

Don't forget to use the cheat sheet to help you.

You do not need to draw out your experiment if you already did this on Monday.

Please read through your own work and see if you can 'mark' it yourself.

### **Maths: Grid method**

As yesterday, please continue your worksheet on using the grid method for multiplication. Re-watch the video or have a look at the PowerPoint again if you want to recap this first.

Remember, you don't need to print off the sheet, you can draw out the grids in your book...please remember to write out everything though, not just the answer.

### **Topic: Plants**

Have fun with your topic today - please see the topic newsletter and attachments from Monday.

Mrs. Jones
