

Times Tables - ways to learn.

Here are some ways to practise your times tables.

This first link below is similar to the way you will complete the multiplication check online when we do this in June. Log onto this and practise everyday and see if you can improve your score.

Throw a dice and multiply this number by the table you are learning. You can throw 2 dice add these together and multiply so you practise all numbers up to the 12th multiple.

Make a set of flash cards for the table you are learning:

On one side of the card write the table - e.g. $4 \times 8 =$ and on the other side of the card write the answer. You can try working through the cards in order and then shuffling them. Or, you could make 2 sets of cards - one with questions and one with answers and match these up or play pairs games.

This link below shared some great ways of learning the 7 times tables: it uses a rhyme to help children to learn and remember the 7s.
