

Thursday 14th May

Good morning everyone

Here are today's jokes:

1] Why was there thunder and lighting in the lab?

Because the scientists were brainstorming.

2] Why are babies so good at football?

Because they practice their dribbling.

3] What is black and white, black and white, black and white, black and white?

A panda rolling down a hill.

Jokes from Katherine Today

Reading – Don't forget to keep reading and enjoying different texts together.

Handwriting:

As Tuesday, you may either print off the sheet and write on this, practise your joined-up handwriting in your book or continue on writing on the handwriting sheet you printed earlier on in the week.

Unit 2 - focus resource. You may also do the extension resource today if you would like to as an extra.

English:

Before you do today's writing, you will need to have completed the 1st science task from the 'Plants week 2' topic sheet. Over the next two days, try write up this experiment. Please see the details on the topic sheet. You do not need to have completed the experiment as there is a youtube link of it on the sheet. I also completed the experiment on the class video I sent you so you can use this too.

Today, look again at the help sheet I attached yesterday on instructions. Read through the planning which you completed yesterday.

Think about turning your notes into full sentences, which have the correct punctuation. Think about your handwriting and forming all of your letters correctly too.

Don't forget to use the cheat sheet from yesterday and your planning sheet to help you.

Maths: Grid method for multiplication

When we were last together, we did some work on multiplication of 2 digit by 1 digit numbers. To solve these, we used a partitioning method. Today I would like you to try a new method - the grid method. This is very similar to what you have already done as you still partition the 2 digit number and work it out in the same way.

For example:

$$12 \times 3 = 36$$

x	10	2
3	30	6

 = 36

Have a watch of the video I have uploaded today as I have given you a quick two minute lesson on this.

I have also attached a PowerPoint is you are having a little trouble with the internet or you want some further information.

Task: - There are some worksheets to do. You DO NOT need to do all of these. Choose your level of learning - there are 2 levels with questions 1-10 on each level. You will have 2 days to do this learning. I suggest the first page today and the second page tomorrow. Try not to do all in one go, as doing some tomorrow will give you a chance to practise the skills you have learnt today.

Remember, you don't need to print off the sheet, you can draw out the grids in your book...please remember to write out everything though, not just the answer.

Topic: Plants

Have fun with your topic today - please see the topic newsletter and attachments from Monday.

Have a good day and I'll write again tomorrow.

Mrs. Jones
